TIME ALLOCATION

(Note: Questions 1-13 were adapted from the Young Lives Round 4 survey; we changed the reference period and expanded the activities list.)

If CR is part of the older cohort (aged ≥ 13), skip to the read statement before Q15.

If respondent in school, school in session: Now I would like to talk about the activities you do on a typical school day (for example, NOT during exams). I want to talk about what you do, and how much time you spend doing it, on a typical school day.

If respondent in school, school not in session: Now I would like to talk about the activities you do on a typical school day when school is in session (for example, NOT during exams). I want to talk about what you do, and how much time you spend doing it, on a typical school day.

If respondent not in school: Now I would like to talk about the activities you do on a typical week day. I want to talk about what you do, and how much time you spend doing it, on a typical week day

Give the respondent 24 beans, and lay out the card illustrating the time use categories. Ask the respondent to distribute the beans according to the amount of hours spent on each activity, as you go through the list. Ask the respondent to round to the nearest hour (so that <30 minutes rounds down, and >=30 minutes rounds up). If the respondent was performing multiple activities at the same time, ask them for the main activity they were performing. If respondent is Muslim, and says prayed 5 times a day for 5 minutes, please round this up to an hour even though only 25 minutes. Make sure all beans are allotted before filling in the responses to this table. (DK for this section=-99; Refused this section=-97).

ASER Educational Testing

Notes: ASER Math and Reading Arabic tests are from the International Rescue Committee's Annual State of Education Report (ASER) pilot in Syria (IRC, March 2017)

Read: Now we will do an activity that involves some reading and math problems. I will provide you a sheet of paper with the questions and ask you to answer them to the best of your ability. I will also give you a pencil and you can write on the paper if you would like.

We want you to try your best, but this is not a test and you will not receive a grade for your work. This is only for our study and I will not share how you do with your parents or anyone else. We are only interested in what you can do comfortably in terms of reading and arithmetic so if you cannot do some or all of it, that is okay. "
