

UK Data Archive Study Number 8866 - Gender and Adolescence: Global Evidence: Jordan Baseline, 2018-2019

GAGE Programme Overview

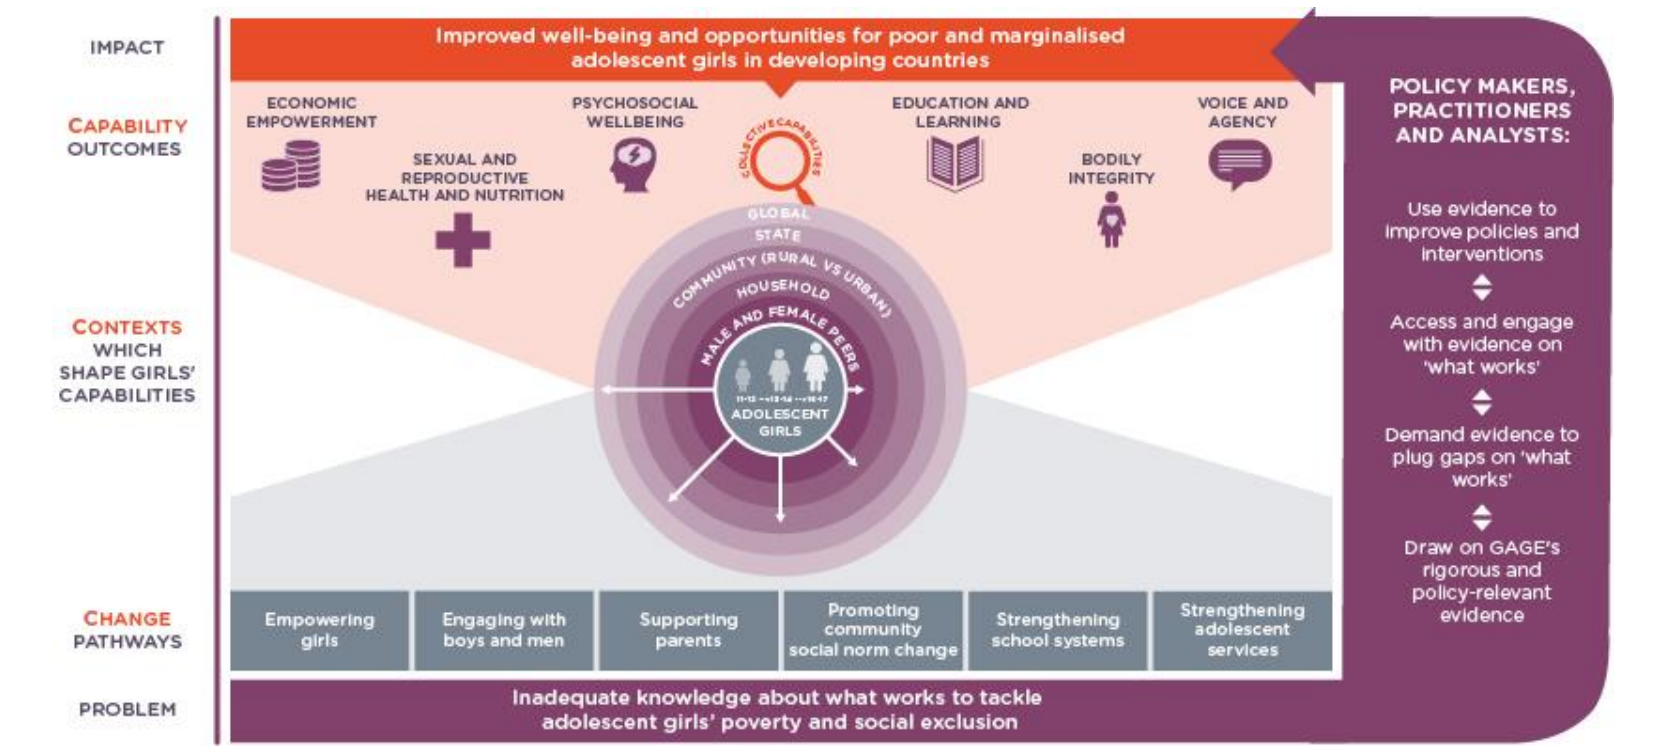

Gender and Adolescence: Global Evidence (GAGE):

A longitudinal research programme (2015-2024)

By finding out '*what works*,' for whom, where and why, we can better support adolescent girls and boys to maximise their capabilities now and in the future

GAGE's 3 Cs conceptual framework

The relevance of GAGE to the SDGs

The 2030 Agenda for Sustainable Development cannot be achieved without investment in adolescents:

- Reduce child poverty

- Address the nutritional needs of adolescents

- Ensure access to SRH and mental health services

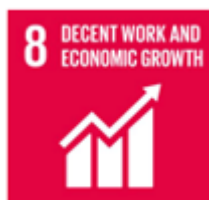

- Ensure girls and boys complete free and equitable education

- Eliminate all forms of violence against all girls, incl. all HTPs

- Sanitation paying attention to the needs of girls

- Decent and full employment for young people

- Social and economic inclusion of all, irrespective of age

- Access to safe and inclusive public spaces, particularly for children

- End trafficking and all forms of violence against and torture of children

Research questions

Stemming from our conceptual framework, GAGE addresses two core sets of questions:

1. Research questions on adolescent perspectives and experiences:

- Girls' and boys' experiences, attitudes and identities across adolescence - including those of the most marginalised
- The role of context and political economy factors in shaping their gendered experiences

2. Research questions on programme effectiveness:

- **Capability Outcomes** – *the effect*
- **Bundling components** – *the combination*
- **Timing** - *when to intervene*
- **Duration** – *with what intensity*
- **Legacy** – *with what sustained cumulative benefits*

GAGE Work-streams:

1. **Evidence Synthesis** of what works globally to enhance adolescent girls' capabilities;

2. **Mixed-Methods Longitudinal Study** in Bangladesh, Ethiopia, Jordan, Nepal and Rwanda with tailored work-streams for:

a. **Quantitative impact evaluation** data collection and analysis;

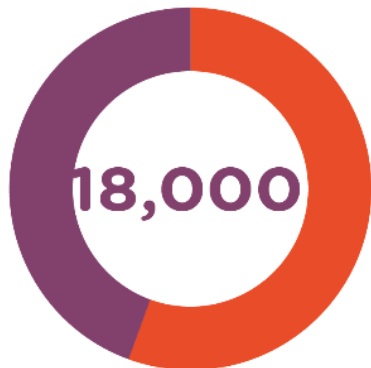

b. **Qualitative** data collection and analysis;

c. **Policy and Legal Analysis**

3. **Participatory Research** with adolescents in Gaza (completed) and Lebanon (ongoing);

4. **Responsive Research and Evaluation Fund (global)** aimed at harnessing innovative evaluation and methodological approaches towards the utilisation of GAGE primary datasets and other under-utilised datasets relevant to adolescents.

Multi-country mixed methods impact evaluation design

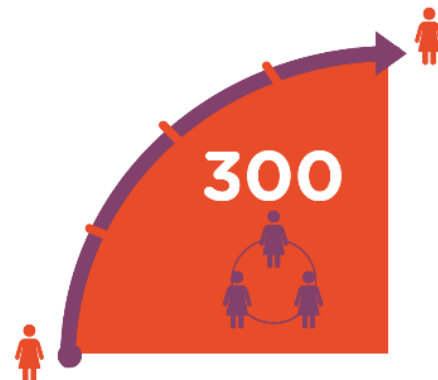

Quantitative survey:

- Adolescent girls and boys + their caregivers
- 2 age cohorts: 10-12 yrs + 15-17 yrs in rural and urban locales, in programme intervention and non-intervention sites
- Sub-sample of adolescents with disabilities

Qualitative and participatory research:

- Nodal adolescents, their siblings, caregivers, community leaders
- Nested sample of adolescents with disabilities
- Key informant interviews and historical process tracing with officials, service providers and donors

Annual qualitative research:

- Nodal adolescents, their caregivers and peer networks to better pinpoint shifts in adolescent capabilities over time
- Social network analysis to understand evolving influence of peer groups

Policy and legal analysis to understand the politics of policy and programme implementation

Programmes we will evaluate

Act with Her (Ethiopia): BMGF funded, INGO programme aimed at girls' empowerment and gender norm change

DFID-funded 12+ programme (Rwanda): targeting 10-12 year old girls focussing on improving the health, social and economic assets of early adolescents

Room to Read (Nepal): exploring the impact and cost-effectiveness of the Girls' Education Programme support adolescent girls access to quality education and transitions

Search for Common Ground (Lebanon): communication for development initiative aimed at promote change among conflict-affected adolescents and youth

UNCIEF and the GoE's child marriage prevention programme (Ethiopia): community awareness and systems strengthening initiative across child marriage hotspots

UNICEF's Makani programme (Jordan): one-stop centre for refugee children/ adolescents and vulnerable children in host communities, camps, ITS

World Bank adolescent education and health sector programme (Bangladesh): aimed at promoting secondary to tertiary education transitions

World Vision's girl clubs initiative (Nepal): following the UNFPA and UNICEF-supported Rupantaran adolescent curriculum

The Culture and Free Thought Association (Gaza): this NGO partners with organisations such as UNFPA to enhance the educational opportunities of refugee children.

Questions?

Research objectives and research questions for the UNICEF Jordan and GAGE longitudinal research study

The aim of the research

- *To shed light on the short- and longer-term effects of programmes to support particularly vulnerable adolescent girls and boys from refugee and host communities*
- *To simultaneously help empower adolescents to critically reflect and articulate their concerns and priorities to programme implementers and policy decision-makers.*
- *To understand the ways in which integrated programming mediates adolescent and youth development trajectories and broader wellbeing,*
- *To understand possible spill-over effects that such programming has on the broader community and social cohesion dynamics and gendered social norms.*

The 3 C's: the three research areas to be explored with UNICEF Jordan's Makani programme

First 'C': Capability Domains

EDUCATION AND LEARNING

- Educational aspirations
- Quality education
- Learning achievements
- Transitions

BODILY INTEGRITY AND FREEDOM FROM VIOLENCE

- Early, forced and child marriage
- Sexual and age-based violence

SRHR, HEALTH AND NUTRITION

- Physical health and nutrition
- Menstruation and pubertal development
- Sexual & reproductive health

PSYCHO-SOCIAL WELLBEING

- Resilience
- Support networks
- Social connectedness
- Quality psychosocial services

VOICE & AGENCY

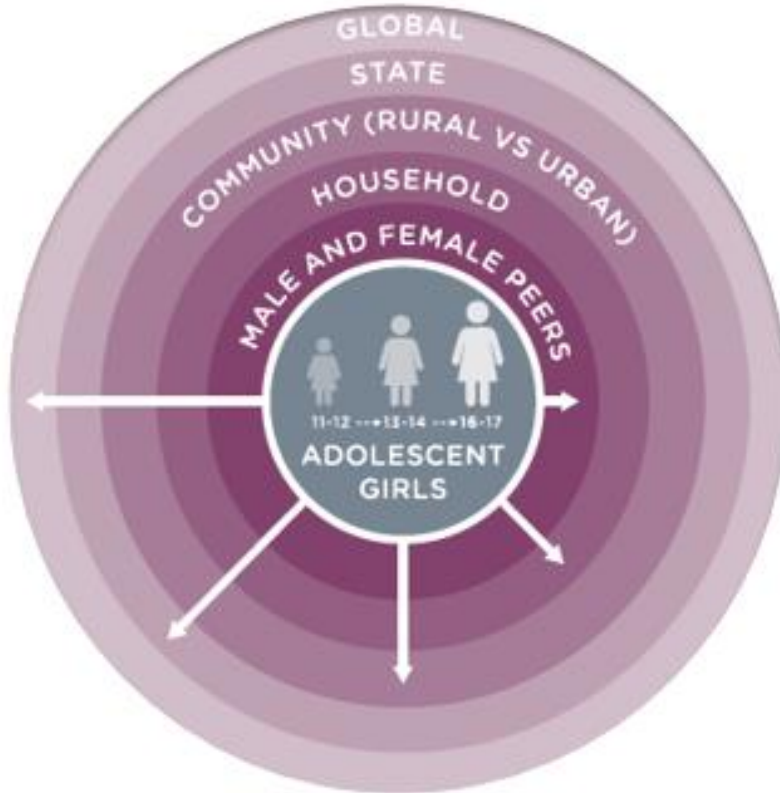

- Mobility
- Safe spaces
- Accessing information safely
- Voice and decision-making
- Civic participation

ECONOMIC EMPOWERMENT

- Numeracy and financial literacy
- Market appropriate skills
- Resource endowments
- Savings and credit

Second 'C': Contexts, including humanitarian and protracted conflict settings

GAGE's conceptual framework recognises that both adolescent girls' capabilities and the change strategies aimed at supporting them are deeply dependent on the contexts in which they are situated.

To facilitate analysis the GAGE framework's ecological approach distinguishes between family, community, state and global context spaces and factors, whilst recognising that in reality context factors may manifest as a web of influences with multiple sites of overlap and inter-connectedness.

Third 'C': Change Strategies within UNICEF integrated programming

Empowering girls
Targeted through programming with age-appropriate content

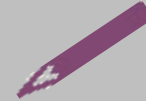

Engaging with boys and men
Engaged through gender-transformative programming to foster positive masculinities

Supporting parents
Engaged through programming to support their adolescents equitably

Supporting communities
Engaged gatekeepers who are supported to accelerate gendered social norm change

Strengthening school systems
Targeted to improve quality teaching, safe environments and learning outcomes

Strengthening adolescent services
Targeted to improve design, quality standards, budget and staff allocations

Makani + integrated youth programming components

PROGRAMME COMPONENTS	GAGE CONCEPTUAL FRAMEWORK
Learning Support Services (LSS):	Education and learning
Life skills training:	Education and learning Voice and agency
Community based child protection:	Psychosocial wellbeing
Awareness Raising Sessions:	Bodily integrity and freedom from violence
Referrals to Specialized Services:	Bodily integrity
Within ITS: primary health services for ITS inhabitants and improved access to WASH	Health and nutrition, WASH
Hajati cash assistance	Economic empowerment
Youth employment skills building and mentoring	Economic empowerment

Discussion

Do these questions resonate? Have we missed anything you think it would be crucial to consider?

On a post-it note, please write two questions related to adolescent capabilities, the Jordanian context or the impact and effectiveness of the Makani approach that you think we should consider with regard to your sector/mandate?

Research design and methodology

Multi-country mixed methods impact evaluation design

Quantitative survey:

- Adolescent girls and boys + their caregivers
- 2 age cohorts: 10-12 yrs + 15-17 yrs in rural and urban locales, in programme intervention and non-intervention sites
- Sub-sample of adolescents with disabilities

Qualitative and participatory research:

- Nodal adolescents, their siblings, caregivers, community leaders
- Nested sample of adolescents with disabilities
- Key informant interviews and historical process tracing with officials, service providers and donors

Annual qualitative research:

- Nodal adolescents, their caregivers and peer networks to better pinpoint shifts in adolescent capabilities over time
- Social network analysis to understand evolving influence of peer groups

Policy and legal analysis to understand the politics of policy and programme implementation

2. What is our proposed approach in Jordan?

Approach in Jordan

- **Objective:** Provide insight into the impacts of the Makani programs. We will interview Makani and non-Makani participants in the same locations.

Locations:

- ***Camps:*** Adolescents and their guardians in refugee camps (Azraq and Zaatari) **Data collection to start end of November 2018**
- ***ITS:*** Adolescents and their guardians in Irbid, Mafrq, and Amman. **Data collection to start in October 2018**
- ***Host communities:*** Adolescents and their guardians in Amman, Jerash, Mafrq, Irbid, and Zarqa. **Data collection to start in October 2018**

Phase 1: Proposed study design in Host

Governorate	Ages	Gender	Makani participants	Non-participants	Totals
Amman	10-12	Male	100	140	240
		Female	100	140	240
	15-17	Male	100	140	240
		Female	100	140	240
Jerash	10-12	Male	50	77	127
		Female	50	81	131
	15-17	Male	5	43	48
		Female	46	46	92
Mafraq/Irbid	10-12	Male	100	140	240
		Female	100	140	240
	15-17	Male	100	140	240
		Female	100	140	240
Totals			951	1367	2318

X 2 = 4636

Phase 1: Proposed study design in ITS

Exploring the effects of the Makani programmes

ITS in Amman, Mafrqa and Irbid			
	Makani participant	Non-participant	Totals
Disability	10		10
Age 10-12			
Male	55	55	110
Female	55	55	110
Age 15-17			
Male	55	55	110
Female	55	55	110
Totals	230	220	450

X 2 = 900

Phase 2: Proposed study design in camps

Exploring the effects of the Makani programmes

	Azraq		Zaatari		
	Makani participant	Non-participant	Makani participant	Non-participant	Totals
Age 10-12					
Male	90	50	90	50	280
Female	90	50	90	50	280
Disabled	3		45		48
Age 15-17					
Male	50	50	50	50	200
Female	35	50	50	50	185
Disabled	3		8		11
Totals	271	200	333	200	1004

X 2 = 2008

Plan International / Max Greenstein

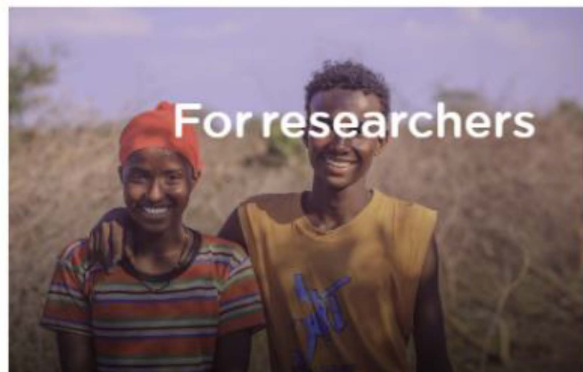

How is GAGE contributing to the achievement of the Sustainable Development Goals (SDGs)?

FIND OUT MORE

GAGE is a nine-year longitudinal research programme generating and communicating knowledge on good practice initiatives and policies that support adolescent girls in diverse contexts.

For researchers

For policy makers
and programme
implementers

For adolescents and
those who care
about them
