

Informed Consent for Adults***Study Title Gender and Adolescence: Global Evidence (GAGE)***

Hello, my name is _____. (Enumerator name)

I am a researcher for Mindset, a research company that generates evidence on what social interventions works and what does not. Currently, Mindset in collaboration with Overseas Development Institute (ODI), UK, are conducting a study related to adolescents and their experiences in Jordan to collect facts and information to understand what is important to adolescents so they can be provided better services. This research study is funded by DFID-UK.

I'm **inviting** you and your son/daughter (.....specify) to participate in this study that will help us to understand the problems young people face to access services and enjoy a good life and what can be done to make things better. We will also be talking with about 4000 adolescents such as your son/daughter and their households. Your participation will help us to know more about the needs of young people and you can ask any relevant questions that you have in mind.

As researchers, we cannot provide any direct benefits, services or assistance, but we hope that our study will be useful for governments and service providers to improve their adolescent policies and programmes. We expect to return to the governorates and areas that participated in the study and share some of the research findings.

If you agree to take part in the study, I would like to talk to you in a place of your choice where you will feel comfortable. This conversation will last no more than two hours. Please be assured that there are no right or wrong answers. It is your experiences and your opinions that we are interested in learning about. You may refuse to answer any question, and you may end the interview at any time. You can decide the date, time and location of the meeting, depending on when is most convenient and comfortable for you. If you agree, we would like to record our conversation for data quality control only and we will store the recording in a safe lockable place. We may ask to visit you once a year/several times between now and 2024 to collect information about changes in your life over that time.

The survey will cover...

- ☐ *Members of your household*
- ☐ *Education of household members*
- ☐ *Parenting*
- ☐ *Health and Nutrition*
- ☐ *Marriage*
- ☐ *Economic Empowerment*
- ☐ *Different aspects of life experience.*

You are free to decide if you would like to talk to us and it is not a problem if you refuse (this will be just between us and no-one else will know). It will not affect any services you are receiving in the community from any of the programmes. It will not affect your relationship with others in your local community or with your employers. There are no risks involved with this study. However, you may feel that some of the questions during the interview are sensitive for you. If you are uncomfortable with any questions or think if they are personal you can choose to not answer them.

Your name and other identifying information will not be intentionally shared with anyone else and we will consider it confidential. There is always the chance that an unauthorized person could see your information, but we have taken measures to reduce this risk, including encrypting and protecting your name and other information that identifies you. Aggregate information will be shared in reports, publications, and other media, but it will not identify you. We may also ask to take a photograph of your ID card for finding you easily when we will come back to interview you again in a year's time. If you feel comfortable allowing us to take a photo of your ID card, the photo will be preserved in an encrypted folder. This is completely voluntary and if you do not want us to take the photo of your ID card, this will not affect your participation in the study or any services you are getting now or in the future.

Should you have any questions now or at any other time about this research and your participation, please feel free to ask. I can be contacted by phone [LOCAL MOBILE NUMBER] or email [xxxxxxx]. You are also welcome to contact [NAME AND CONTACT DETAILS OF LEAD COUNTRY RESEARCHER].

Response:

If I have answered all your questions, do you agree to participate in this study? *(Surveyor should indicate subject's response or have them sign their name. In case the subject is illiterate or blind, they may use an "X" or other mark in place of an actual signature or if they are unable to sign, so long as the subject understands what has been read to them, the surveyor signs the consent form, attesting that the document was read in its entirety to the subject, and that the subject agreed to participate.)*
